

```

1  int x=0;
2  void * run (void * arg){
3      if (x==1)
4          x++;
5  }
6  int main(){
7      x=1;
8      pthread_t t1,t2;
9      pthread_create(&t1,NULL,run,NULL);
10     pthread_create(&t2,NULL,run,NULL);
11     pthread_join(t1,NULL);
12     pthread_join(t2,NULL);
13 }

```
